SUMMARY

Full-stack Web-Developer with excellent organisational skills, self-reliant and independent with strong critical and logical thinking as showcased through progress in a bachelors degree in mathematics. With a certificate in full-stack web-development (Bootcamp) and experience in collaborative projects, there are multiple roles that suit my qualifications. The utilisation of personal attributes such as ambition, creativity alongside good critical and logical thinking ensure engagement and quality as a Full-stack web developer.

TECHNICAL SKILLS

Languages: JavaScript, CSS, REACT, HTML, CSS, | Databases: MySQL, MongoDB | Tools: Git & Heroku

PROJECTS

Catch Source Style

Jan. 2021 - Feb. 2021

Group Project | <https://github.com/bencyna/Catch-Source-Style> | <https://bencyna.github.io/Catch-Source-Style/>

- Developed a responsive mobile-first app that allows users to upload images and view fonts, can interact with and save to local storage.
- Using external APIs to generate information in Javascript. Use of HTML, CSS and CSS framework
- Worked on both front and back-end primarily focusing on getting the font-API to appear and use the user's output to display the correct items.

Project Two

Mar. 2021 - April. 2021

Group Project | Coding Bootcamp

- Developed a responsive mobile-first app that allows users to upload images and view fonts, can interact with and save to local storage.
- Using external APIs to generate information in Javascript. Use of HTML, CSS and CSS framework
- Solving conflicts within the group ensuring harmonious interactions through pressure points.

Project Three

May. 2021 - Jun. 2021

Individual Project | Coding Bootcamp

- Developed a responsive mobile-first app that allows users to upload images and view fonts, can interact with and save to local storage.
- Using external APIs to generate information in Javascript. Use of HTML, CSS and CSS framework
- Solving conflicts within the group ensuring harmonious interactions through pressure points.

EXPERIENCE

Co-Founder
